Summary of the work

By using Html,css and javascript ,I have created 4 sections separately and created 4 web pages separately according the given 4 frames in figma.I created animations and transition to make the ui nice.I Created a Dockerfile to set up an Nginx container to serve the website.I exposed port 80 and map it to port 3000 on the host and configured a volume to sync the website's public files from the host to the container
